### **DETAILED ACTION**

1. The following is an examiner's statement of reasons for allowance: The prior art as applied in earlier office action fails to teach the application where the values that are calculated and used in the equation in the independent claim, as in claim 1, nor is suggested by the reference used, for the detection of the degradation in accuracy in relatively insufficient completion of the reaction. The instant application indicates the stages of homogenization and/or completion of a reaction even at low concentration that is not suggested by the prior art. Even though Smith used in the Office Action dated 20 June 2008 teaches the adulteration of urine where the absorbance of the sample mixed with a reagent liquid is monitored in 30 second increments, there is no suggestion or motivation as to determine the homogenization or completion of the reaction occurring.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
